## PROFESSIONAL SUMMARY

---

Full Stack Developer with over three years of experience in designing, developing, and deploying web applications. Proficient in front-end and back-end technologies, including Laravel, Vue.js, React.js, and MySQL. Committed to learning new technologies and delivering high-quality code. Proven ability to work in fast-paced environments and deliver projects on time.

## SKILLS

---

- Frontend: React.js, Vue.js, JavaScript, JQuery, Next.js, Bootstrap, JavaScript, AJAX
- Backend: Laravel, PHP, MySQL
- Other Tools: REST APIs, Git, Laravel Nova

## WORK EXPERIENCE

---

### Full Stack Developer ManiaLab Creative Agency

May 2024 - Present

- Developed and managed APIs and management systems using Laravel and Laravel Nova.
- Integrated designs and data with Vue.js for seamless front-end experiences.
- Built and maintained databases, including developing control panels for data oversight.
- Delivered projects involving dynamic survey systems, registration systems, QR code generation, and automated email notifications.

### Full Stack Developer CompuVision

April 2023 - April 2024

- Designed and developed a sports club management system with reservation features, expanding from a mobile app to a web dashboard.
- Built client dashboards with performance metrics and reservation management tools for enhanced scheduling control.
- Developed systems for staff tracking, financial monitoring, and item management.
- Maintained scalable PHP APIs and built an e-commerce platform with secure payment integration using Next.js.

### Full Stack Developer Freelance Project

December 2022 - March 2023

- Developed a Learning Center Management System using Laravel API for backend and React.js for frontend.
- Designed secure, scalable APIs and integrated them with a responsive React.js interface for real-time updates.
- Implemented MySQL databases to manage courses, student data, and learning resources.
- Delivered a robust and interactive user experience through seamless API integration with the frontend.

**BackEnd Developer  
Ishatri**

**February 2022 - September 2022**

- Enhanced and updated a wholesale management system built on OpenCart by optimizing queries and implementing new features.
- Developed new pages for calculating staff salaries and added other features to improve system efficiency.

**EDUCATION**

---

**Bachelor of Science in Information Technology  
Lebanese University**

**October 2015 - October 2018**

**TRAININGS**

---

**Codi Tech Bootcamp**

**February 2021 - August 2021**

- FrontEnd Development: Gained proficiency in React.js and built multiple projects showcasing responsive and dynamic web applications.
- BackEnd Development: Acquired hands-on experience with Laravel and MySQL, focusing on creating secure APIs, managing databases, and developing backend logic.
- Algorithm and Data Structures: Learned foundational principles for optimizing code performance and data handling.
- PHP & OOP: Gained strong knowledge of object-oriented programming using PHP, applying OOP principles to various projects.
- Agile Methodology: Worked within an Agile team, learning the importance of iterative development, teamwork, and regular sprints to deliver features incrementally.
- Teamwork: Collaborated on multiple projects, enhancing teamwork and communication skills to ensure successful project delivery.
